

Project Overview

- ❖ Client: AFC Bournemouth
- ❖ Project: Training Pavilion
- ❖ Challenge: Timeframe

Modulek Services

- ❖ Project Management
- ❖ Groundworks
- ❖ Off-site manufacturing

Objectives

To install a new training pavilion to facilitate the additional space needed for the Premier League requirements.

Solutions

Modulek was able to install the new training facility within just 6 weeks.

Results

AFC Bournemouth now have the facility to compete in the worlds most competitive football league.

“ We knew it was going to be a big moment getting our training base in one venue. We feel now we have a club moving into the league we are in.

What impressed us most was the speed at which they worked, the quality of their craft, and the manner in which they did it.

Everyone we dealt with was very friendly – this has contributed to the overall standard of what we are trying to deliver to the players, which in turn will help results – maybe not directly, but when you combine everything together, it was a huge step for the club – so can’t thank everyone enough.”

Eddie Howe Ex AFC Bournemouth Manager
