

## Project Overview

- ❖ Client: Carshalton School
- ❖ Project: Classroom Block
- ❖ Challenge: Build location
- ❖ Project size: 28 modules

## Modulek Services

- ❖ Design
- ❖ Project Management
- ❖ Groundworks and Foundations
- ❖ Off-site Construction
- ❖ Service Connections.

## Objectives

To create a new learning environment for Design and Technology, Art, and Food Tech.

To bring all areas of learning and support under one roof.

## Solutions

Due to the location of the building in the school's quad, off-site construction enabled the building to be craned into location.

## Results

The new classroom block has made learning and accessing facilities a lot more streamlined for staff and pupils.

*“The building is 100 times better than what we had previously, the old one was really outdated. The new one is so much more spacious and modern looking and it’s just going to add so much more to the school.”*

**James Fairlamb**  
**Assistant Premises Manager**
