- ❖ Project: Retail outlets
- ❖ Project Size: 8 new units

## Modulek Services

- ❖ Project Management
- ❖ Groundworks and piling
- ❖ Internal fit-out and finish
- ❖ Service connections
- ❖ Off-site manufacturing

### Objectives

Hamble Marina were looking to expand their retail outlet and attract new clientele to their beautiful location.

Eight additional retail units were required to fulfil their growth plans.

### Solutions

Modulek's unique hybrid construction method meant that construction could take place whilst the Marina was in its busiest footfall period and also ensured that the project was completed on time.

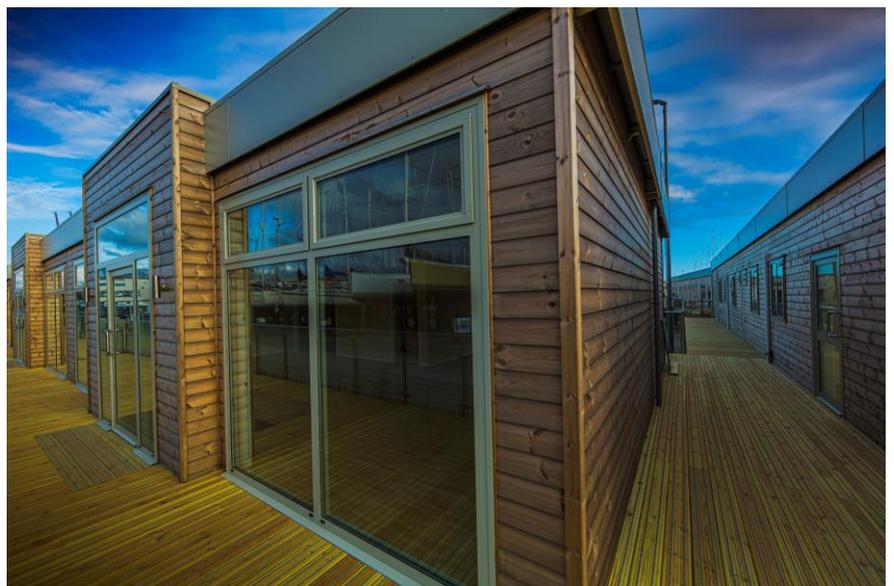

### Results

The retail units were designed to blend with their coastal environment, and coupled with the yacht spinnakers in the background, they create a stunning backdrop for a perfect customer shopping experience.

As part of Hamble Marina's growth plans, an additional eight individual retail units were required to be constructed at the heart of its busy thriving marina.

It was important that the nautical theme was the centre of our design. The new buildings have large expansive glazing to the front and sides of each retail unit to create an outdoor feel to enhance the shopping experience.
