

Project Overview

- ❖ Client: Peter Symonds College
- ❖ Project: Classroom Block
- ❖ Challenge: Timeframe
- ❖ Project size: 3 Storey block

Modulek Services

- ❖ Design
- ❖ Project Management
- ❖ Groundworks and Foundations
- ❖ Off-site Construction
- ❖ Service Connections.

Objectives

To rescue a traditional build project that had run out of time.

To ensure the new building is ready for the start of the new term.

Solutions

Modulek was able to complete the building within just 6 weeks.

A new 3-storey building was put in place in keeping with existing surroundings.

Results

Modulek's unique hybrid construction method enabled the building to meet the strict timeframe with the new building in place in just 6 weeks.

The new facility was designed to blend with the existing buildings on site, bringing a sleek modern external appearance into the setting.

Four Science Laboratories, a Library, and a Preparation Room gave the College the additional space they needed to enhance the learning and working environment for students and staff.
